1. Welcome to Prayer Dome

Welcome to **Prayer Dome — A House of Prayer for All Nations** (Matthew 21:13, Mark 7:37). Prayer Dome is a Christian community platform for daily prayer, Bible study, devotionals, live services, events and fellowship — available on web at **prayerdome.net**, as a PWA, and as an Android app (ID: *net.prayerdome.app*).

This guide explains every feature of the platform, how to use it, and how to get help. Whether you are a first-time visitor, a long-time member, a volunteer, or a ministry leader, you will find step-by-step instructions, tips, and best practices.

Theme Scripture — Mark 7:37: *“He hath done all things well: he maketh both the deaf to hear, and the dumb to speak.” — “He does everything blamelessly.”* You will see this verse across the site, on the splash screen, in notifications, and in the footer. It is Prayer Dome’s permanent theme.

Who this guide is for

- **New members:** learn how to create an account, navigate, and join prayer.
- **Regular worshippers:** get the most from Bible, Prayer Wall, Sermons, Translate, Live.
- **Leaders & Admins:** understand content management, banners, announcements, news, stats.
- **Mobile users:** install the app/PWA, enable notifications, use offline features.

2. About Prayer Dome

Prayer Dome is a Christ-centered ministry founded by **Pastor Seedwell K. Masuku**, with a mandate to raise an army of intercessors globally, demonstrating the raw power of the Holy Spirit through healing, deliverance, and prophetic direction.

Mission & Vision

	Statement
Mission	To spread the Gospel of Jesus Christ, raise faithful disciples, and transform lives through prayer, worship, teaching, and
Vision	To build a strong and spiritually mature generation that reflects the character of Christ and impacts communities and na

What We Do

- **Prayer & Intercession** — regular gatherings, online prayer wall

- Sunday Worship Services — in-person and live-streamed
- Bible Teaching & Discipleship — daily devotionals, Bible center, sermons, quizzes
- Youth & Women Programs — empowerment and leadership development
- Evangelism & Church Planting — across Zambia, Eswatini, Ireland
- Music & Worship Ministry — worship atmosphere, radio mix
- Community Outreach — compassion to widows, orphans, vulnerable
- Leadership Development — mentorship and training

Core Values

Value	Meaning
Faith in God	Trusting God in all circumstances
Prayer & Worship	Prioritizing God's presence
Holiness & Integrity	Living blamelessly before God
Love & Compassion	Showing God's love to all
Unity & Service	Working together for the Kingdom
Biblical Truth	Standing on God's Word
Leadership & Discipleship	Raising the next generation
Holy Spirit Power	Walking in supernatural grace

3. Getting Started

Visiting the site

- Go to **<https://prayerdome.net>**. The site works on any modern browser (Chrome, Safari, Firefox, Edge).
- No account is needed to read the Bible, devotionals, news, or watch public media — but creating an account unlocks Prayer Wall posting, Testimonies, Chat, Reviews, Wallet, and Giving history.
- The site is hosted on Vercel and Firebase Hosting. Both serve all static files from the repository root. This PDF lives at **[/Prayer-Dome-User-Guide.pdf](#)** in the repo root so it is publicly downloadable.

Creating an account

- Click **Account** in bottom navigation or top-right menu → **Sign Up**.
- Use email + password, or Google sign-in if enabled in Firebase Auth.
- After sign-up, Firebase creates your membership doc in *memberships* collection. You can set your display name, photo, bio, location.
- Verify email (check Spam folder). Verification improves security and unlocks full features.
- Set a profile photo via Cloudinary upload widget (resizes & crops automatically).

Logging in & Profile

- **My Account (/account.html):** view your profile, prayer requests, testimonies, giving history, wallet balance, notifications settings.
- **Dark Mode:** toggle moon/sun icon in top bar. Preference is saved in localStorage.
- **Logout:** inside Account page. Clears local session but keeps cached content.

If you forget password, use *Forgot Password* on login — Firebase sends reset link. For any account issue, contact info@prayerdome.net or WhatsApp +268 7658 1804.

4. Homepage Walkthrough

The homepage (/) is the hub. It includes dynamic personalization, live data, and shortcuts to all major features.

Top Bar & Drawer

- **Top Bar (pd-topbar):** Hamburger menu (left), centered Prayer Dome logo, right side: language selector, bell (notifications), theme toggle.
- **Drawer Navigation:** slide-in menu with all pages: Home, Live, Prayer Wall, Bible, Sermons, Media, News, Testimony, Events, Chat, AI Assistant, Gallery, Quiz, Give, Account. Shows theme scripture Mark 7:37 in footer.
- **Language Selector (pd-lang-select):** English, Tumbuka (tum), siSwati (ssw), Bemba (bem), Nyanja (nya). Choice persists via PDApp.i18n.
- **Bell Icon:** shows unread count combining announcements + instant in-app push notifications. Red badge = unread.

Key Homepage Sections

Section	What it does
---------	--------------

Splash Screen	Shows Prayer Dome logo + Mark 7:37 while app loads, then fades out.
Location Card	Detects your location via browser geolocation + reverse geocoding (OpenStreetMap). Shows 'You are
Announcement Marquee	Auto-scrolling news ticker. Admin can schedule announcements in admin.html → stored in Firestore +
Hero	Branded blue/gold hero with typing welcome messages, CTA buttons: Watch Live, Prayer Wall, Read
Featured Scripture	Permanent Mark 7:37 card from translation pack, with audio and version switcher.
Community Stats	Members, prayer requests, testimonies, countries reached, live viewers, prayer groups — baseline fro
Founder Card	Pastor Seedwell K. Masuku photo, title, bio. Premium glass card with brand styling.
Daily Devotional	Rotates Morning / Afternoon / Evening based on local timezone. Shows verse, insight, prayer, countdo
Portal Grid	16 quick links: Bible, Assistant, Sermons, Translate, Gallery, Give, Live, Quiz, Membership, Support, T
Upcoming Events	Firestore query: next 2 events where date >= now. Click → events.html.
Recent Testimonies	Latest 2 testimonies (orderBy timestamp desc). Encourages members to share.
Christian News Preview	3 latest news cards from PDApp.news (seed from pd-content-data.js). Link to News Center.
Branch Tracker	Chama Zambia, Manzini Eswatini HQ, Cork Ireland — calculates distance from your location, highlight
Member Reviews	Firestore reviews collection (max 10). Star rating, photo, date. Logged-in users can write review via CL
Footer	Links: Facebook, WhatsApp, Email, Admin, Finance, Privacy. Contact phone +268 7658 1804. Logo +
Bottom Nav	Sticky: Home, Bible, Pray, Sermons, Assistant, Account. Active state styling. + Admin tab if role=admin
Ticker Bar	Gold marquee with ministry slogans: House of Prayer, Jesus same yesterday...

5. Daily Devotional System

Imported from **devotional-data.js**: `getDailyDevotional()`, `getNextUpdateTime()`, `formatCountdown()`. The system is timezone-aware and rotates three times daily.

Period	Time (local)	Tone & Focus
Morning	05:00-11:59	Faith, purpose, strength to start day — icon fa-sun
Afternoon	12:00-16:59	Guidance, perseverance, mid-day reflection — fa-sun/cloud

Evening	17:00-04:59	Rest, peace, gratitude, night prayer — fa-moon
----------------	-------------	--

- Displays: time indicator (pulse glow), timezone (via ipapi.co fallback to Intl API), verse card with quote icon and bounce animation, commentary card, prayer card, countdown timer (update-badge gold badge).
- Content fades in with fadeSlideIn animation. Verse icon bounces.
- Checks every 60s if period changed or date changed → updates UI automatically, stores last period/date in localStorage.
- To contribute devotionals: edit devotional-data.js array with verse references, commentary, prayer. Keep message pastoral and short.

The devotional is fully offline after first load — works without internet because data is bundled JS, not Firestore.

6. Bible Center (/bible)

The Bible Center is a fast, searchable KJV reader with bookmarks, highlights, and cross-language support.

- **Reader:** book/chapter/verse navigation, font size controls, dark mode, verse click → copy/share.
- **Search:** type any word, phrase, or reference (e.g., 'John 3:16' or 'love'). Cross-language search: typing siSwati word *umelusi* or Tumbuka *muliska* finds Psalm 23 in translation pack.
- **Verse of the Day:** deterministic daily verse → stable across page reloads (seed = date).
- **Audio:** read-aloud via browser SpeechSynthesis. Shows voice fallback notice when using nearest language voice.
- **Bookmarks & Notes:** saved to Firestore if logged-in, else localStorage. Syncs via Firestore on login.
- **Sharing:** generates OG image cards, social share URLs, and WhatsApp/Facebook friendly links via `/api/share.js`.

Pro tip: Use URL query `?q=John 3:16` on prayerdome.net/bible to direct-link a search — useful for sermons and social posts.

7. Prayer Wall (/prayer)

- **Post a request:** title, category (Healing, Family, Breakthrough...), details, anonymity toggle, urgent flag.
- Requests stored in Firestore *prayerRequests* with `serverTimestamp`. Others can pray (tap Pray button increments prayer count, triggers confetti).

- **Answer & Testify:** if your prayer is answered, mark as answered → prompts to create testimony in Testimony Center.
- **Filtering:** by category, answered vs unanswered, my requests vs all, urgent.
- **Real-time:** onSnapshot listener shows new prayers instantly without refresh.
- **Moderation:** admin can hide/report abusive requests via admin dashboard.

8. AI Prayer Assistant (/ai-prayer)

A fully offline, browser-based assistant — no API keys, no backend, privacy-friendly. Implemented in `ai-prayer-data.js`.

- Data-driven hero with dawn sunrise photo and illustrated topic artwork (10 topics have art, 9 fallback to gradient tile with glyph).
- **Topics:** Anxiety, Healing, Family, Breakthrough, Guidance, etc. Each shows relevant scriptures, prayer points.
- **Chat Mode:** type natural language (e.g., 'pray for my exams') → engine matches keyword stems, returns scriptures + pastoral response.
- **Per-verse translation:** if a displayed verse exists in translation pack, Tumbuka/siSwati buttons appear beneath it with draft disclosure badge. If no translation exists, no buttons — silence over wrong translation.
- **Share & Copy:** copy prayer points, share via Web Share API.
- Works offline after first load — all data bundled.

9. Sermon Center & Audio Narration (/sermons)

Six bundled narrated Bible stories (seed) + admin-publishable Firestore extras.

Title	Theme
The Father Who Ran	Prodigal Son — grace
The Giant Was the Smaller Problem	David & Goliath — courage
He Was in the Boat the Whole Time	Calming the storm — faith
The Window He Refused to Close	Daniel — integrity
For Such a Time as This	Esther — purpose

Who Is My Neighbour?

Good Samaritan — love

- **Narration engine:** one paragraph per SpeechSynthesis utterance (accuracy + skip + avoids ~200-char truncation bug on mobile).
- Controls: Play/Pause, Previous/Next paragraph, Stop, Speed 0.6×–1.4×, click paragraph to jump, keyboard Space/←/→/Esc.
- Paragraph highlight syncs with audio. If no speech engine, shows friendly message and still allows reading.
- Each sermon: title, subtitle, series, speaker, scripture, summary, keyVerse, body paragraphs (2–4 sentences, <600 chars each — enforced by tests), prayer, reflection questions.
- **Adding sermons:** bundled = append to PD_SERMONS in sermons-data.js; admin = docs shaped {title, subtitle, series, speaker, scripture, summary, keyVerse, body, topics, image, prayer, reflection}. Call pdMergeAdminSermons(docs). Admin sermons show 'New' badge and appear above bundled.
- Filtering by topic, series, speaker, search.

10. Translation Center (/translate)

Five-language platform: English (KJV, exact), Chitumbuka (tum), siSwati (ssw), Bemba (bem), Nyanja (nya). 33+ verses including Mark 7:37 theme, side-by-side comparison, search, verse of day, read-aloud.

■■ **Important — Draft Notice:** Tumbuka, siSwati, Bemba, Nyanja are community drafts, machine-assisted, awaiting fluent review. Every entry carries *reviewed:false* and UI shows **Draft badge**, prominent top notice stating text is draft, not published Buku Lakupatulika or siSwati Bible, and shared text includes '[Community draft — awaiting review]'. Do NOT remove notices. Misrepresenting scripture is real harm. Please get fluent speakers to review 32 verses — an evening's work each — before promoting. To sign off: correct string in translation-data.js, set reviewed:{en:true, tum:true,...}, add reviewer field. Draft badge auto-hides. Voice fallback: Tumbuka→Nyanja/Swahili, siSwati→Zulu then English, with user disclosure.

- Search in any language — cross-language search implemented via normalized lowercased mapping.
- Language selector in top bar (PDApp.i18n) persists choice.
- Verse details show reviewer info, draft status, share/copy with disclosure.
- Volunteer CTA: page invites readers to volunteer for review.
- PD_LANGUAGES declares fallback chain visible in tests.

11. Live Service & Gospel Media

Live Service (/live)

- Scheduled live schedule (Sunday 09:00 CAT), countdown timer, live chat via /chat or /Chat.html (case-insensitive redirect).
- Video player: YouTube/Cloudflare Stream or custom HLS. Config in live-stream-config.js (note: rotate Cloudinary secret if exposed).
- Stats: live viewers count from PDApp.live module (Firestore).
- When offline: shows next service time, sermon replay, prayer CTA.
- Ticker, notifications integration, share.

Gospel Media — Video Center (/video)

- Gallery of video messages, music videos, testimonies.
- Lightbox player, category filter, search.
- Shareable URLs via /video/:id → rewrites to video.html.

12. Radio, Podcasts & Christian News

Radio & Podcasts (/radio)

- Stations from PD_CONTENT.DEFAULT_RADIO: Prayer Dome Radio, Worship Mix. StreamUrl editable by admin in Firestore.
- Audio player with play/pause, background play (Media Session API).
- Podcasts from PD_CONTENT.DEFAULT_PODCASTS: narrated Bible stories, daily encouragement.
- If stream fails, shows friendly fallback and retry.

Christian News Center (/news)

- Cards: featured image, category, title, summary, author, date. Seed 3 stories (premium multi-language launch, revival weekend, testimonies).
- Full reader: click card → opens full body with share buttons (Facebook, WhatsApp, copy link).
- Admin can publish via admin dashboard — data stored in localStorage under keys, mirrored to Firestore when online.
- Home preview shows latest 3, sorted featured.
- Open Graph: /news/:id rewrites via Vercel to /api/share?type=news&id=:id for rich link previews.

13. Testimony, Events, Chat, Gallery, Quiz

Testimony Center (/testimony)

- Submit testimony: story, category, photo/video (Cloudinary), anonymity option.
- Approval flow: admin approves → appears publicly, triggers notification.
- Filter by answered prayers, category, latest. Shareable via /testimony/:id.
- Gospel impact: testimonies auto-show on homepage recent testimonies.

Events (/events) & Event (/event)

- Calendar list + grid, filter by month/category/location.
- Event details: title, date (moment.js formatting), location, description, registration CTA, share.
- Events query: Firestore where date >= now, orderBy date asc, limit.
- Admin creates events via admin.html; stored with Timestamp.

Community Hub Chat (/chat)

- Real-time chat via Firestore collection + BroadcastChannel for offline sync.
- Rooms: General, Prayer, Youth, Leaders (role-gated).
- Message types: text, prayer request link, Bible verse link.
- Typing indicators, online presence.
- Implementation note: Chat.html capital redirect enforced in vercel.json and firebase.json to /chat.

Gallery (/gallery)

- Photos from services, outreaches, branches. Lightbox, category filter.
- Upload via Cloudinary preset gallery_uploads. Admin approval.
- Grid responsive, lazy-load.

Bible Quiz (/quiz)

- Multiple-choice questions from quiz.html, score tracking, timer.
- Categories: Bible knowledge, devotionals, sermons.
- Share score, leaderboard via Firestore.
- Confetti on high scores.

14. Membership & Giving

Membership (/membership)

- Tiers: Bronze, Gold, Platinum, Diamond — explain benefits (events priority, counseling, resources).

- ## Give (/give)

- ## 15. Support & Secure Wallet (4 Programs)

Hero Banner

- ## Three Main Tabs

Programs & Tiers Detail

Program	Bronze	Gold	Platinum	Diamond/Premium
Education	\$5-50 Basic	\$50-100 Standard	\$100-500 University	\$500-1k International
Business	\$5-50 Micro Startup	\$50-100 SME	\$100-500 Expansion	\$500-1k Enterprise
Compassion (Funeral)	\$2.50-25 Basic	—	\$25-50 Extended</br>Standard	\$50-100 Premium

Secure PIN Wall

- Full-screen overlay (#secureOverlay) with fingerprint icon, title 'Secure Access' or 'Create Wallet PIN' if first time.
- 4 pin-dot visuals, numpad 0-9 + cancel + backspace. Auto-submit on 4th digit.
- Logic: if no stored PIN → updateDoc wallets/{uid} pin:btoa(pinInput), 'PIN Secured!' + green shield animation. If exists → compare btoa(pinInput) == storedPin → 'Verified!' or 'Invalid PIN'.
- Actions protected: view wallet, reveal MoMo, request withdrawal.
- On success: finalizedAccess() → for wallet: auto-reveals numbers, switches tab active, loads data; for reveal: unveils blur-text, hides reveal button; for withdraw: opens withdraw modal.

Enrollment

- openEnrollForm(type,tier,min,max) → sets activeEnrollment, fills modal title/sub, limits label, default amount = min, shows #modalEnroll.
- Fields: Monthly Contribution Amount (\$, number), Next of Kin (Full Name, Phone, Relationship) inside branded card.
- Validation: amount within tier, kin fields filled. Duplicate check: query activePlans where userId==uid AND planType==type AND status==active → if not empty, error 'already have active plan'.
- On confirm: addDoc activePlans {userId, userName, planType, planTier, monthlyAmount, nextOfKin:{name,phone,relation}, status:'active', createdAt:serverTimestamp()}. Shows toast, confetti, clears form, switches to MY PLANS tab.

My Plans & 1-Year Maturity

- loadMyPlans(): query activePlans where userId==uid (no orderBy to avoid index), sort in-memory by createdAt desc.
- For each plan: calculate daysActive = moment().diff(createdAt,'days'), progress = min(daysActive/365*100,100), maturityText = if progress>=100 'MATURED' else 'Matures in {365-days} days'.
- Theme color by type: Education green, Business dark blue, Funeral dark red. Card has left border 6px, tier tag, monthly seed, next of kin, progress bar gradient gold→green, progress container blur background.
- File Claim button → openClaimForm(planId, planType).

Dynamic Claim Form (by type)

- **Education:** asks Institution/School Name, Student ID, docs: Acceptance Letter/Proof of Enrollment, Latest Academic Results.
- **Business:** asks Business Name, Registration Number, docs: Business Plan/Proposal, National ID Copy.
- **Funeral:** asks Name of Deceased, Date of Passing, docs: Official Death Certificate, Your ID Copy.
- ClaimDocs object stores uploaded URLs.
- Doc upload via Cloudinary widget cloudName:'prayerdome', uploadPreset:'gallery_uploads', formats jpg/png/pdf, max 5MB. On success: sets claimDocs[docKey]=url, updates status '■ Uploaded'.

- Validation: amount >0, type-specific fields filled, all required docs uploaded. If missing → toast.
- On submit: addDoc supportClaims {userId, userEmail, planId, planType, requestedAmount, details:extraData, documents:claimDocs, status:'pending', createdAt}. Confetti, reload wallet.

Wallet, Deposits, Withdrawals

- **Balance:** wallets/{uid} doc, field balance. Displayed as \$ {fixed 2}. Default 0 if doc missing.
- **MoMo Reveal:** section .secret-reveal with blur-text id revealTarget (filter blur 8px, pointer-events none). Unveiled class removes blur. Official number +268 7658 1804, Account Name PRAYER DOME GROUP, Copy button via navigator.clipboard.
- **Deposit Modal:** Amount (\$, min \$5), doc-upload-zone receipt (icon file-invoice-dollar). triggerCloudinary('deposit','receipt'). On submit: addDoc deposits {userId, userEmail, userName, amount, currency:'USD', proofUrl, status:'pending', createdAt}. Toast 'submitted for approval', confetti.
- **Withdrawal Modal:** Amount min \$10, MoMo Number to Receive. Checks wallets/{uid} balance >= amount → if insufficient, error. Otherwise addDoc withdrawals {userId, userEmail, userName, amount, receivePhone, status:'pending', createdAt}.
- **Transaction Ledger:** fetch deposits, withdrawals, supportClaims where userId==uid (no orderBy), merge array, sort in-memory by date desc, slice 20, render with icon (dep green down, with red up, claim file), amount +/-, date moment format, status color: approved blue, rejected red, pending orange badge.

Security: All financial ops require PIN. Deposits/withdrawals/claims status pending → admin/finance approves in finance.html or admin.html → updates wallet balance via increment and marks transaction approved.

16. Navigation, Notifications & UX Tips

Feature	How to use
Bottom Navigation	Always visible. 6 items: Home, Bible, Pray, Sermons, Assistant, Account. Admin tab added dynamically
Ticker Bar	Gold bar above bottom nav, infinite scroll of slogans. Pure CSS animation 35s linear.
Notifications Panel	Two-layer: premium panel #pdNotifPanel (PDApp.notifications) + legacy #notificationList (announcements)
Announcements	Firestore notifications collection orderBy createdAt desc limit 30. Each has title, message, time formatted
Dark Mode	Toggle via theme-btn or bottom? Saves to localStorage? Actually body class dark-mode toggled, theme
Toast	Small popup top-right 3.5s, success green left border, error red. Used for feedback on actions.
Confetti	canvas-confetti lib via CDN. Used on review submit, claim submit, donation, prayer.

Splash & Motion	pd-motion.js adds aurora backdrop, scroll reveal (pd-reveal), count-up stats, progress bar, tilt, ripple. Parallax
Search & Deep Links	Most pages support ?id, ?q query. Clean URLs via vercel.json rewrites: /bible→bible.html, etc. TrailingSlashes
Service Worker (sw.js)	Precache v4, cache-first for js/css/images 7 days, network-first for HTML. Cache-Control headers defined

17. Languages, Accessibility & PWA

Languages

- 5 languages: English (en), Chitumbuka (tum), siSwati (ssw), Bemba (bem), Nyanja (nya).
- Top bar selector persists. PDApp.i18n updates data-pd-t elements.
- Translation Center shows side-by-side + prominent draft disclosure for non-English.
- SEO: og locale en_US but manifest categories lifestyle/education/social.

Accessibility

- All animations disabled under prefers-reduced-motion: aurora stops, reveals instant, marquee freezes, progress bar not created — tested in tests/content.test.js & premium.test.js.
- Semantic HTML, ARIA labels on drawer, bell, language, buttons.
- Keyboard: Space Play/Pause, ← → Prev/Next, Esc Stop in Sermon narration.
- Contrast: blue #0A4D9B + gold #D4AF37 meets WCAG on white/dark.
- Focus outlines, tap-highlight transparent but keyboard focus visible.

PWA Installation

- manifest.json: name Prayer Dome — Daily Prayer, Bible & Christian Community, short_name Prayer Dome, theme #0A4D9B, display standalone, icons 192/512 via i.ibb.co logo, shortcuts to Bible, Prayer Wall, Assistant, Live, Sermons, Translate.
- Install prompt: on Android Chrome, 'Add to Home Screen' or 'Install'. Works offline after first visit thanks to sw.js.
- sw.js cache name prayer-dome-v4 — bump when releasing new build so visitors get fresh files.

18. Mobile App (Android)

Android wrapper via Capacitor, application ID net.prayerdome.app, ready to open in Android Studio after sync.

Step	Command/Note
Install deps	npm install
Sync web bundle	npm run mobile:sync — copies web files to mobile/www/ (which is gitignored)
Open Studio	npm run mobile:open
Debug APK	npm run mobile:build:debug → android/app/build/outputs/apk/debug/app-debug.apk
Release AAB	npm run mobile:build:release → android/app/build/outputs/bundle/release/app-release.aab (needs release keystore)
Signing	android/keystore.properties, .jks, .keystore gitignored — never commit. See mobile/README.md & PLAY-STORE.md

- android/ folder contains native project. mobile/ folder contains www copy source.
- Capacitor config capacitor.config.json sets webDir, appld.
- Push notifications: firebase-messaging-sw.js handles Firebase Cloud Messaging, cache-control no-cache.
- Permissions: camera, microphone, geolocation enabled via Permissions-Policy header in vercel.json (camera=(self), microphone=(self), geolocation=(self)) + similar headers in firebase.json.

19. Admin & Finance Roles

Access controlled via memberships/{uid} role field = 'admin' or 'finance'. Check via getDoc doc(db,'memberships',uid). If role admin → bottom nav appends Admin link (#nav-admin-link) red icon, shows #btn-admin in footer. If finance or admin → shows #btn-finance.

Admin Dashboard (/admin.html)

- **Manage:** announcements bar, hero banners (schedule start/end), news, stats edit, sermons compose form, events creation, testimonies approval, users list, gallery moderation, notifications push, language content review, finance approvals.
- **Firestore collections:** notifications, banners (default PD_CONTENT.DEFAULT_BANNERS), news, events, testimonies, prayerRequests, reviews, activePlans, supportClaims, deposits, withdrawals, memberships, wallets.
- **Each module:** list view, edit form, publish → setDoc/updateDoc/addDoc with serverTimestamp, deleteDoc, onSnapshot sync to PDApp via PDApp.setFirestore bindings.
- **PDApp.setFirestore**({db, doc, getDoc, setDoc, updateDoc, addDoc, collection, query, orderBy, limit, getDocs, onSnapshot, serverTimestamp, Timestamp}) — called on every page to enable real-time sync.

Finance Dashboard (/finance.html)

- View deposits, withdrawals, support claims, giving history.

- Approve/reject: on approve, increment wallets/{userId} balance (for deposits) or decrement (withdrawals) via increment field, update status to approved, log transaction.
- Export ledger, charts, monthly totals.
- Secure PIN not needed here — Firebase Auth + role check ensures only finance/admin access.

20. Privacy, Safety & FAQs

Privacy (/privacy.html)

- Data collected: email, display name, photo, prayer requests, testimonies, giving/wallet — stored in Firebase Firestore.
- Cloudinary used for image uploads (profile photos, review photos, gallery, payment receipts, claim docs) — cloudName prayerdome, presets profile_photos, gallery_uploads, folder review_photos, clientAllowedFormats jpg/jpeg/png/pdf, max 5MB.
- Location: only browser geolocation on homepage for branch distance + worshipping-from card, reverse via OSM, no storage beyond session unless user allows.
- No third-party tracking beyond required Firebase Analytics. Cloudinary secrets must be rotated — check live-stream-config.js not exposing secret.
- User rights: can request data deletion via contact.

FAQs

Question	Answer
Forgot PIN?	Contact admin/finance — they can reset PIN in wallets/{uid} by deleting pin field, then you set new PIN v
Why Draft badge on Tumbuka?	Community draft awaiting fluent review — honesty to avoid misrepresenting scripture. Volunteer to review
Chat not loading?	Check login, internet; Chat uses Firestore — if quota exceeded, fallback to local BroadcastChannel may
Payment not reflected?	Deposits are pending until admin approves receipt. Ensure screenshot clear, amount matches. Contact
How to share sermon?	Use share button → copy link /news/:id style deep links via /api/share.js for OG previews.
App vs Website?	Same features; app adds push notifications, offline cache, native splash. Website easier for sharing.

21. Troubleshooting

Issue	Fix
-------	-----

Page blank / spinner infinite	Hard refresh Ctrl+Shift+R, clear cache, check sw.js version prayer-dome-v4 may need update
Location not detecting	Allow location permission in browser (padlock icon). Try Retry button. If denied, branch distance
Audio narration not speaking	Check device has English speech voice, not muted, volume up. On iOS, need user interaction
Notifications not showing	Check bell icon, mark all read. Allow browser notifications via manifest. Firestore rules may block
Dark mode not persisting on some pages	pd-motion.js mirrors dark-mode to html element — if page has data-pd-no-aurora, aurora disabled
PDF not downloading	Ensure you are at https://prayerdome.net/Prayer-Dome-User-Guide.pdf (copy of this PDF lives
Cloudinary upload fails	Check preset exists (profile_photos, gallery_uploads), network, file size <5MB, format jpg/png
Wallet balance 0 after deposit	Deposit pending approval — check Transaction Ledger → status ■ Pending → admin approve

22. Contact & Support

Channel	Details
Website	https://prayerdome.net
Email	info@prayerdome.net (mailto link in footer)
WhatsApp	+268 7658 1804 (Eswatini) — also Footer & Support page
Phone	+268 7658 1804
Facebook	https://www.facebook.com/profile.php?id=847255098474902
Locations	Manzini, Eswatini (HQ); Chama, Zambia (Central); Cork, Ireland (Europe Branch)

User Guide PDF	https://prayerdome.net/Prayer-Dome-User-Guide.pdf — this document

For urgent support: use WhatsApp link on site (footer .social-link.whatsapp hover #25d366) or email. For payment issues, include transaction ID, screenshot, amount, date. For translation review volunteering: contact via /translate page volunteer CTA or email with subject 'Translation Review: [Language]'.

For technical issues with site, include browser, device, URL, steps to reproduce, screenshot.

Final Blessing: *Thank you for being part of Prayer Dome — A House of Prayer for All Nations. May Mark 7:37 be true in your life today: He does everything blamelessly. Your prayers, your giving, your testimony matter — they strengthen the whole family across Zambia, Eswatini, Ireland and beyond. Welcome home.*

Appendix — Technical Reference for Developers

For maintainers: repo structure, hosting, routing, headers.

Repository Root (Static Hosting)

- All HTML files served from root: index.html, bible.html, prayer.html, etc. Also assets/ (og-image.png 728KB, hero-worship.jpg, pd-app.js 47KB, pd-brand.css 46KB, pd-content-data.js 6KB, pd-motion.js 10KB, plus sermons/support/testimonies folders).
- api/share.js (104 bytes) — generates OG meta for /news/:id, /testimony/:id, /share/:type/:id rewrites.
- functions/ (Firebase functions), functions_index.js, firebase.json, vercel.json, manifest.json, sw.js (5.5KB) cache v4, robots.txt, sitemap.xml 3.8KB, seo/ folder.
- This PDF: Prayer-Dome-User-Guide.pdf must be at root — firebase.json public='.' ignore list: firebase.json, vercel.json, capacitor.config.json, package.json, package-lock.json, android/**, mobile/**, scripts/**, seo/**, api/**, functions/**, **/*.*, **/node_modules/** — pdf NOT ignored, so served. Vercel cleanUrls true serves it too. Add header in vercel.json for pdf: Cache-Control public, max-age=604800.
- Build: npm test runs tests/content.test.js (83 assertions), assistant.test.js (21), pages.test.js (36, needs jsdom), seo/apply-seo.py --check. Total 140 passing.

Routing (vercel.json & firebase.json)

Source	Destination
/news/:id	/api/share?type=news&id=:id (Vercel) / news/** → function share (Firebase)
/bible	/bible.html
/prayer, /prayer-wall	/prayer.html
/ai-prayer, /assistant	/ai-prayer.html
/live, /livestream, /live-stream	/live.html
/sermons, /sermon	/sermons.html
/translate, /bible-translation	/translate.html
/Chat.html (capital)	→ /chat permanent redirect
/index.html → /	permanent
/Prayer-Dome-User-Guide.pdf	(static file in root — served directly, no rewrite needed)

Headers

Source	Headers
(.*) all	X-Content-Type-Options nosniff, X-Frame-Options SAMEORIGIN, Referrer-Policy strict-origin-when-cross-origin
sw.js, firebase-messaging-sw.js	Cache-Control public max-age 0 must-revalidate, Service-Worker-Allowed /
/(.*)\.html	Cache-Control 0 must-revalidate
.js/.css/.png/.jpg etc	Cache-Control 604800 stale-while-revalidate 86400
robots.txt, sitemap.xml, manifest.json	Cache-Control 3600, correct Content-Type
Suggested for PDF	Content-Type application/pdf, Cache-Control public max-age 604800 (add manually in vercel.json)

To ensure PDF is downloadable: copy to repo root (cp ./path/to/pdf ./Prayer-Dome-User-Guide.pdf), git add, commit, push to main, deploy. Vercel/Firebase will serve at <https://prayerdome.net/Prayer-Dome-User-Guide.pdf> with default MIME. Verify via curl -I <https://prayerdome.net/Prayer-Dome-User-Guide.pdf> should show 200 and content-type application/pdf. If 404, check hosting ignore, vercel rewrites ordering, and that file is committed (git ls-files | grep pdf).
